Hi David,

I want to let you know about an Amateur Radio project at Portland State University. The Portland State Aerospace Society at PSU is the lead organization building Oregon's first amateur radio satellite, a 2U CubeSat named "OreSat". OreSat was selected as part of the 2017 NASA CubeSat Launch Initiative (CSLI). OreSat is a completely open source CubeSat that has two primary missions: a "video from space" amateur radio-based STEM outreach to Oregon high schools, and a multi-camera system for investigating the global distribution of high altitude Cirrus clouds. More information can be found at <https://oresat.org/>.

When we submit our IARU frequency coordination application, we need to identify an ARRL contact. Are you willing to serve as the ARRL contact person in Oregon who we can identify on our application? Listing you as the contact simply means that you have awareness about this project and requires no additional responsibilities.

Please contact me if you have any questions. I hope to hear from you soon.

Kind regards and 73,
Glenn, KJ7SU

Glenn N. LeBrasseur, KJ7SU

Portland State University Mail - Oregon's first CubeSat - Permission to Serve as Contact

As the OR Section Manager for ARRL it is my duty to assist in projects like this and I will be more than glad to help in any way I can. I wish you well in this important project! Please keep in in the loop as needed.

73,

Dave
